

M P

Corrosion Inhibitor Machinery & Moulding-Tool Protector

An exceptional corrosion inhibitor that provides >18 months protection even if items are stored in the open.

PROPERTIES:

Colour: **Transparent/yellowish**

Specific weight: **0.81**

Drying time (at 20°C [70°F]): **90 minutes**

Film thickness – normal: **10 microns**

Solvent: White spirit – **free from aromatic compounds**

CFC free.

OPERATIONAL PERFORMANCE

BiRAL MP provides a dry, wax-like corrosion protection film for metals of all types. It has good 'creep' properties therefore normally difficult to treat areas such as holes, folds and overlaps can be protected. Tests at The Yamazaki Seiki Institute one of Japan's most distinguished and advanced laboratories showed BiRAL MP to be the best corrosion inhibitor available. The dry protecting film also has good lubricating properties and shows no negative influences in contact with rubber or plastics materials.

GENERAL AREAS OF APPLICATION:

Originally developed as a super protector for plastics & rubber moulding tools MP has since been proved excellent for protecting machinery, machine tools, tools & equipment whilst not in use or in storage, long term or interim. MP provides unbeatable protection for items being shipped overseas. MP provides excellent protection for all metals especially against the influence of high humidity.

Supplied in 500ml tins – 12 to a box. 5 & 20L containers.

500ml and 100ml Tins

No.1 at sea

or on land
