

SCH Materials

A Division of SCH Services Ltd

At SCH, we are experts in the production and application of **Conformal Coatings**, used to protect electronic circuit boards from harsh operating environments and to enhance their life expectancy.

SCH Materials offers a range of highest-quality, competitively-priced coating products, including:

ACRYLIC

SILICONE and

POLYURETHANE coatings,

As well as a complete range of associated

CLEANING

THINNING and

STRIPPING solutions,

sufficient to meet the requirements of most repair and rework applications.

Products for all applications are available, including traditional, solvent-based solutions and the latest **water-based** and 'VOC-free' technology, representing the ultimate development in eco, user and environmentally friendly materials.
